

Magnetic Fastening System for Cable Management

Eliminate Grinding, Welding, Bolting & Strapping

ESTECH Magnetic Bracketing Systems

American Tank Maintenance now offers guidance in bracketing selection and custom bracketing solutions to accomplish regulatory cable management goals.

Managing cable attachments on water towers has never been easier. Using high strength rare-earth magnetics, the patented and proven Talon bracketing system offers a multitude of advantages for water tower owners. The Talon bracket requires NO field modification, adjustments or tools. Each order arrives ready for installation and is pre-formed to the curvature of steel to be attached. Compatible with flat, convex and concave diameters.

Leave bolting, banding, welding behind and look forward to magnetic bracketing systems.

- Rare earth permanent magnetics
- Variety of designs, customizable
- Cellular and wireless internet
- Survives tornadic winds with wind rating of 150 mph
- Fast installation/industry common "snap-in" ready
- Non-invasive to coatings systems
- Stainless, corrosion resistant system
- Pre-formed to match curvature of steel
- Available for composite and glass lined surfaces
- Patented # 9,252,581

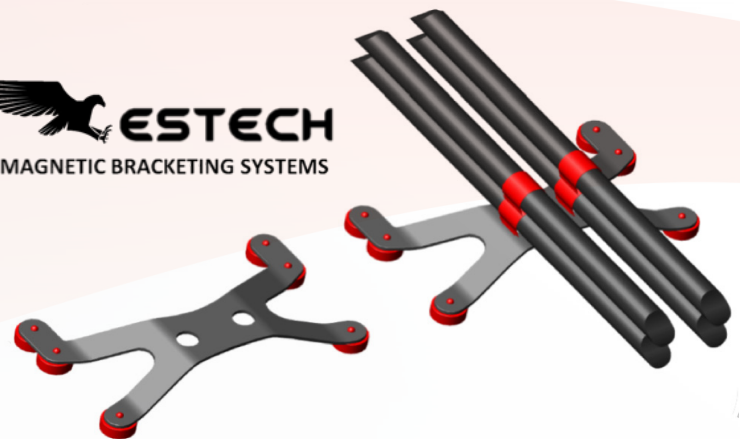

ESTECH Magnetic Bracketing Systems support regulatory code and OSHA law and are engineered with a range of 45 to 540 pounds of permanent magnetic force.

American Tank Maintenance offers guidance in bracketing selection and custom bracketing solutions to accomplish regulatory cable management goals. Industry proven Snap-In cable clamps secure and "snap" cables into place within the bracket integral socketing ports.

Now you have a new solution in cable management on water towers.
